# The Finest Hardwoods

The beauty of solid hardwood is on the outside, but under the surface lies a combination of strength, flexibility, and durability that cannot be matched by synthetic or engineered substitutes.

The first critical step in producing fine hardwood furniture is selecting the best and most consistent woods. We then store our lumber in a humidity controlled environment to minimize expansion and contraction during manufacturing.

One characteristic of solid hardwood furniture is that each plank used is unique. There are natural variations in color – lighter pieces are closer to the bark, darker pieces are closer to the tree's center. At Superior Furniture we use both variations of color to give our bedroom suites a rich and outstanding beauty.

You will find natural markings on your bedroom suite, such as knots where the tree branches grew. They do not affect strength and attest to the fact that your piece is genuine solid hardwood, with all of its charming irregularities.

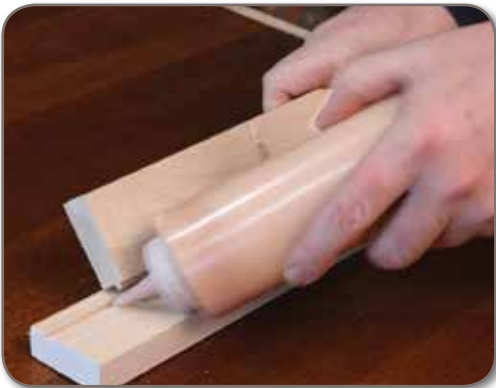

# The Heart of a Craftsman

What lies inside the craftsman who makes a fine Superior Furniture bedroom suite? What keeps him working hard each day with the utmost care? What motivates him to produce furniture that will endure the rigors of time and constant use?

It could be the knowledge he possesses. He knows wood species inside and out. He is a master of the tools he uses. His keen eye can detect the kind of imperfections in a board that makes it unsuitable for use. He knows every measurement, every cut, and how to fit each piece together perfect to create a work of art!

But is he led by something more than just knowledge?

Yes, he is. It's his heart that leads him on. His heart that keeps him focused each moment on making the finest piece of furniture he can. His heart guides every movement of his hand when he is sanding and every gaze of his eye when he is inspecting his work.

Simply put, it's the heart of a Superior Furniture craftsman, one full of passion and commitment that results in the end product of his labors — a masterpiece that will be treasured for generations to come.

Queen  
Shown with 360 Storage Rail

**13172  
Bed**

Queen  
Also available with low  
footboard. See price list  
#13176 for Queen size.

# Care & Maintenance Guide for your Furniture

**Conversion Varnish** is the most commonly used finish in the high-end furniture market. When properly applied and cared for, the beauty of your furniture's finish will be enjoyed for many generations. Conversion Varnish has excellent resistance to foods, beverages and common household chemicals. However, to maintain the beautiful appearance of your furniture, a few care guidelines must be followed:

- Excessive waxing can cause moisture from a beverage can or glass to leave a milky white ring on the surface.
- Do not use cleaners containing bleach
- Avoid cleaners with abrasives, they may scratch the finish.
- Do not allow cleaners containing ammonia to come in contact with your furniture's finish. Ammonia may turn oak black and painted pieces yellow.
- Dyes and inks may discolor the finish. The ink and dyes from newsprint and plastic bags may penetrate into the finish when moist.
- Conversion Varnish offers a very hard mar resistant surface, but like any finish, it may still be scratched or damaged if not cared for properly.

It should be noted that our new Conversion Finish does not achieve its maximum performance properties for at least 30 days from the time it was finished. This is based on maintaining a temperature of at least 70°.

## CLEANING GUIDELINES

Generally a soft damp cloth followed by a dry cloth will be all you need to clean the finish. If a cleaner is required, use only a very mild soap and wipe dry. A high quality furniture polish may be used occasionally. Apply polish with a soft cloth following manufacturer's instructions.

Follow these steps and you will be assured that your finished piece will continue to look good for many years to come.

### CLEANING:

Fingerprints, cooking residues, tobacco smoke, etc. will accumulate on any finished surface. They will not damage the finish, but should be removed occasionally to restore the finish to its original state. Wipe the finish with a damp cloth using a non-wax polish or mild soap.

### SPILLS:

Your finish is resistant to most household spills. If a spill should occur, it should be wiped up immediately to avoid any potential damage.

### EXCESSIVE EXPOSURE:

Heat, high humidity, direct sunlight or liquids can damage both the finish and the wood. Take care to avoid these conditions.
